

Carrier and Technology Integrations

Whistl's unique portfolio of bespoke delivery management solutions sits at the centre of an integration ecosystem, connecting seamlessly with your technical infrastructure and sales channels:

How do I integrate with Whistl?

Whistl offers 4 integration methods for processing orders and printing labels:

Retain existing label production method by integrating with your OMS, WMS or CEM

Integrate from within Whistl software directly with eBay, Amazon, Shopify, WooCommerce and Magento

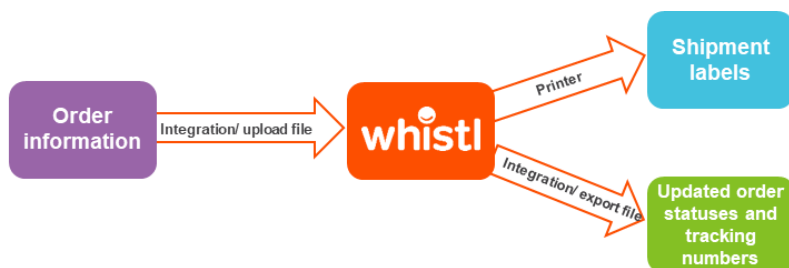

For any system that doesn't have a direct integration, we can offer our CSV integration option

Manage and track shipments automatically using your own system with the Whistl API

How does this work?

Integration is linking one resource to another, i.e. Whistl to eBay and to your Freshdesk account. Whether you use Whistl on its own or with other pieces of software, you can automate significant parts of your label production and tracking support processes. Each integration works slightly differently, but the standard flow is as follows:

Features:

- Automatic label creation
- Parcel status feedback
- Generate shipping manifests and pick sheets
- Access from within your current platform
- Integrate with your customer experience management platform

Benefits:

- Accelerate your label production
- Decrease cart abandonment with greater delivery choice
- UK-based in-house software support
- Access decades of experience implementing carrier management solutions for retailers and major brands
- Increase visibility of tracking support

Why Whistl?

As the UK's leading logistics specialist, we provide efficient, high-quality and competitively priced services across [Business Mail](#), [Parcels](#), [Fulfilment](#), [Contact Centres](#) and [Doordrop Media](#) both in the UK and internationally.

We help brands and businesses overcome challenges and help them be more efficient, deliver a high-quality level of service and delight their curiosity, through a range of delivery management and customer service solutions.

Our mission is to grow by doing a great job, with can-do people working efficiently to deliver exceptional services to all of our customers.
